PROFESSIONAL SUMMARY

Versatile Full Stack Developer with expertise in creating high-performance applications across front-end and back-end technologies. Designed AI-driven solutions, including an Instagram automation panel and robust advertising analytics platform, driving efficiency and ROI insights. Proficient in Next.js, React, and TypeScript, enhancing legacy systems and integrating complex functionalities. Passionate about mentoring developers and optimizing workflows, consistently delivering scalable and user-friendly interfaces

SKILLS

- JavaScript / TypeScript
- Node.js / Nest.js
- React / Next
- Java Spring Boot
- Go
- Redux
- PostgreSQL / Redis / S3
- CI/CD
- AI-driven solutions
- Mentoring

EMPLOYMENT HISTORY

Aug 2025

Full Stack Developer, Self-Employed

China, Shanghai

Full Stack Developer responsible for key projects and product development. Designed an AI-driven Instagram automation panel for seamless content scheduling, integrating MCP servers for efficient API interactions. Created a robust advertising analytics application with complex data pipelines, offering real-time ROI insights using Java and GAQL. Developed a lightweight Telegram web player prioritising cross-platform compatibility and low-latency streaming. Spearheaded fullstack development of multimedia and gaming platforms using Astro.js for SEO enhancement. Participated in the modernization of a legacy e-commerce platform, migrating it from PHP + Angular to Go + React, resolving numerous optimization-related issues and improving the overall user experience.

- Designed AI-powered dashboard for automated Instagram posting.
- Created comprehensive analytics platform for advertising campaigns.
- Developed high-performance web player for Telegram.
- Spearheaded scalable multimedia and gaming environments.
- Participated in e-commerce platform migration.

Jan 2024 — Aug 2025

Full Stack Developer, FinOffice

China, Shanghai

Developed and integrated foreign payment systems using Next.js and Supabase. Established document flow system for radio with React and Java. Transferred MS Excel analogue project for 1C from JS to TS, enhancing layout, development, icons, and logic. Developed server-side Java scripts for performing large-scale analytical computations. Contributed to port management system development with React, TanStack, and TailwindCSS, leveraging numerous pre-built tools.

- Integrated foreign payment systems seamlessly.
- Created efficient document flow system for radio.
- Transferred project from JS to TS, enhancing overall functionality.
- Introduced new features to legacy code for improved performance.

Changed the place of work after finishing the project

Oct 2023 — Jan 2024

General Programmer, SIBINTEK (ROSNEFT)

Russia, Moscow

Collaborated with team lead and PO to streamline workflow, enhancing communication. Developed micro frontend for ITSM system using DDD architecture. Created domain-level module with Redux (ngrx) and facade patterns, configured DevExtreme grids.

- Streamlined information flow, fostering team collaboration.
- Developed scalable micro frontend components.
- Implemented domain-level modules using advanced design patterns.

Changed the place of work due to the problem with permanent residence registration document

Feb 2021 — Oct 2023

Middle FrontEnd Developer, Amtech

Russia, Moscow

Developed document management modules for Moscow Government departments using Angular and lazy loading for optimization. Integrated modules with business logic engines and refined document versioning functionality for field comparison. Used Java Spring Boot to build CRUD modules for government reference data and implement business process workflows (chains) over SOAP. Conducted interviews and mentored new developers. Administered Git workflows, establishing naming conventions and conducting code reviews.

- Enhanced application performance through lazy loading techniques.
- Improved document versioning processes, similar to Git functionality.
- Mentored developers, fostering team growth and skills development.
- Streamlined Git administration, ensuring effective version control.

Changed the place of work with the aim of developing my own skills in a higher - management position

EDUCATION

Sept 2019 — Jul 2023

Business Analytics & Architecture, NUST MISIS

Russia, Moscow
